Executable: ListFonts

Executable "ListFonts" produced by Target "ListFonts" of Project "ListFonts"

▼ Path to Executable produced by Target "ListFonts"

Path: ListFonts.app [Choose...]

▼ Arguments

Launch Arguments
<input checked="" type="checkbox"/> -DHELLO

```

<orn> wos: err... wacky Xcode
<wos> lol...humor list discussion at work is debating whether or not invocation of Godwin's Law or Hubzilla will successfully terminate a stupid discussion
<wos> Hubzilla being the Godzilla-shaped FireWire hub which always seems to put in an appearance in internal humor discussion threads that run too long
<uhtu> heh
<wos> cool... the skirts playing in SJ next weekend
<uhtu> wos: which will occur? or which will it take?
<wos> which will it take? along with "can their impact be negated by premature invocation?"
<wos> ooo! "EXTREME ELVIS (SF) wsg THE EXTRA ACTION MARCHING BAND"
<wos> that's gotta be a good show :)
<uhtu> omg
<uhtu> when!
<wos> sat, may 15th. in sj
<wos> red elvises on sun, jun 13th
<uhtu> doh
<orn> err... so where's that info/panel/pane to set the launch arguments??
<wos> under "Executables" in the left hand column, select the application
<wos> this is in the "Project View" window
<orn> yeah, looking at that
