21:43 @orn> or blame the author of Fire.app
21:43 @uhtu> bash didn't fuck up my colors
21:44 @orn> oh... preferences change, possibly wiped out your old settings
21:45 @uhtu> man does anti-aliasing suck
21:45 bservo> when done inappropriately.

    joined #optimus
21:45 @orn> you should be able to turn that off... or adjust your settings for
    the display
21:45 @uhtu> in terminal.app it sucks
21:45 @uhtu> yah, i'm trying to get this back to non-suck mode
21:46 @uhtu> :-))
21:46 bservo> sucks as in primus, or sucks as in ballz? :)
21:46 ark[tab]> is there a difference?
21:46 @uhtu> what he said
21:46 @evilai> monaco regular 9.0 pt
21:46 @orn> f?ckf?ckf?ckf?ckf?ck
21:46 @evilai> width 1.0
21:47 @evilai> heightr .9
21:47 bservo> watch your foreign tongue!

21:48 @uhtu> evilai: no font problems, just fugly interactions. hrm
21:48 @mobius> roar?
21:48 @evilai> interactions? screen shots?
21:49 @rjn> what's an example of a program that does antialiasing properly?
21:49 @uhtu> there we go
21:49 @uhtu> $TERM was fucked up
21:49 @rjn> have only seen acroread, and its ugly
21:50 @rjn> or at least the characters make me squint
21:50 @mobius> antialiasing in term was fugly for me too.. but i never turned
    it on before panther
21:50 @uhtu> neither had i.
21:51 @orn> uhtu: post your results for `defaults read com.apple.terminal`
21:51 @uhtu> boo! it lost my time prefs
